## System Emulation

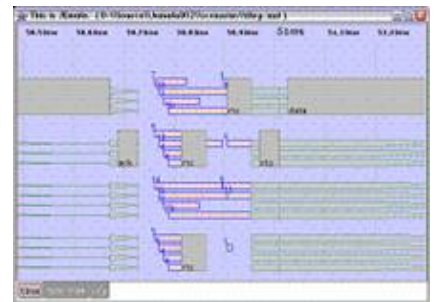

This is our emulation tool used in the book. The source code is in an early stage. The basic mechanisms of the Medium Access Control protocol of IEEE 802.11 are emulated and visualized.

We use

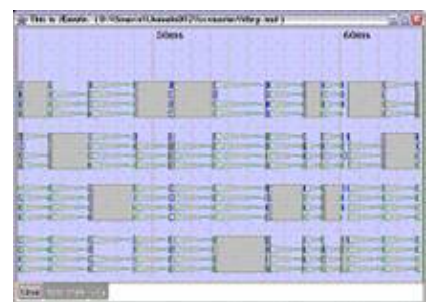

- JAVA Java 2 Platform, Standard Edition 5.0 Eclipse
- JIGLOO GUI builder
- Morphon XML

You can download the software [here](#).

Please have the book ready for proofing its purchase.

## Book Slides

A presentation containing all figures of the book sorted in the order of their appearance can be download [here](#). These slides provide a fundamental basis for a lecture about IEEE 802 wireless systems.

Please have the book ready for proofing its purchase.
